PROFESSIONAL SUMMARY

Detail-oriented Electrical Engineering graduate with proven field experience in smart meter deployment, Distribution Transformer Center (DTC) operations, and industrial electrical maintenance. Action-oriented professional with a strong track record of executing field operations accurately, improving workflow productivity, and utilizing utility data systems like MDMS and MIS. Adept at troubleshooting and adhering to rigorous safety standards, seeking to leverage technical expertise in a growth-oriented engineering role.

PROFESSIONAL EXPERIENCE

Junior Engineer

March 2025 – Present

Riddhi Corporate Services Limited & Adani Energy | Pune, India

- Execute end-to-end consumer smart meter installations, ensuring high operational accuracy, adherence to technical guidelines, and customer satisfaction.
- Manage Distribution Transformer Center (DTC) and feeder meter installations to optimize grid reliability and data tracking.
- Utilize Meter Data Management Systems (MDMS) and Management Information Systems (MIS) to log field data, streamline operational processes, and improve daily reporting productivity.
- Conduct systematic site inspections and technical meter readings to proactively identify and report system anomalies.

Apprenticeship Trainee

November 2023 – November 2024

National Thermal Power Corporation (NTPC) | Solapur, India

- Assisted senior engineering teams in daily electrical maintenance and routine thermal power plant operational activities.
- Monitored industrial electrical systems, diagnosing and troubleshooting equipment faults to minimize operational downtime.
- Gained comprehensive hands-on training in high-voltage industrial safety protocols and preventive maintenance schedules.

TECHNICAL SKILLS & COMPETENCIES

Field Operations:

Smart Meter Installation, DTC Installation, Feeder Meter Installation, Field Inspection & Operations

Core Engineering:

Electrical Maintenance, Fault Troubleshooting, Preventive Maintenance, Industrial Safety Standards

Systems & Software:

Meter Data Management Systems (MDMS), Management Information Systems (MIS), MS Office

Key Strengths:

Technical Problem Solving, Analytical Thinking, Team Collaboration, Field Adaptability under Pressure

ACADEMIC PROJECTS

Pin Diode-Based Fire Sensor

- Designed and engineered a high-sensitivity fire detection system utilizing a PIN diode sensor for industrial safety applications.
- Configured the system to detect visible light and Infrared (IR) radiation within the 430nm to 1100nm spectrum, enabling reliable, long-range hazard detection.

EDUCATION

Bachelor of Technology (B.Tech) – Electrical Engineering

Graduation: 2023

CSMSS Chh. Shahu College of Engineering, Chhatrapati Sambhajinagar | Score: 7.47 CGPA

Higher Secondary Certificate (HSC)

Graduation: 2019

Kaushalya Vidyamandir and Junior College, Pategaon, Paithan | Score: 67.54%

Secondary School Certificate (SSC)

Graduation: 2017

Kaushalya Vidyamandir School, Pategaon, Paithan | Score: 73.40%

PERSONAL DETAILS & LANGUAGES

Languages Known: English, Hindi, Marathi

Nationality: Indian
